Regolatore Solare MTDC

La centralina differenziale MTDC è un moderno regolatore elettronico per impianti solari. Dotata di ampio display permette un utilizzo efficiente e un controllo del funzionamento dell'impianto solare. Un comodo sistema di assistenza al primo avvio vi guiderà passo passo nella configurazione del vostro impianto. Numerosi sono gli schemi idraulici pre-impostati nella centralina, riportati di seguito.

Dati Tecnici	
Sensori di temperatura Pt1000	3
Relay outputs 230VAC	1
0-10V or PWM outputs	1
Alimentazione	230 VAC
Grado di protezione	IP 40

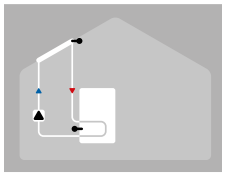

Codice	Prezzo
C22130020	**€ 403,00**

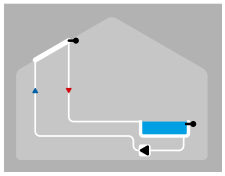

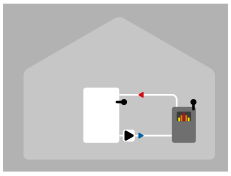

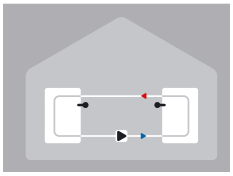

Schemi d'impianto pre-caricati

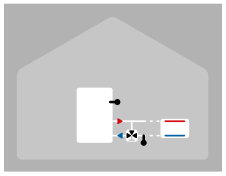

TESTED

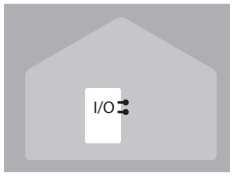

Solare con accumulo

Solare con piscina

Caldaia a legna con accumulo

Carico accumulo

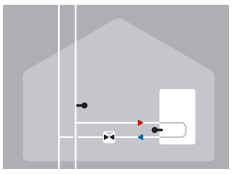

Innalzamento ritorno

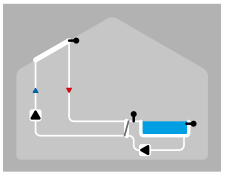

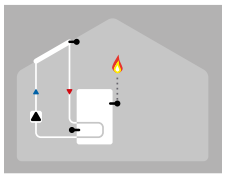

Funzione termostato

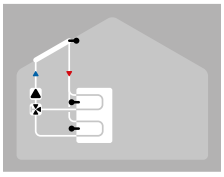

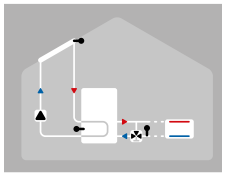

Δt universale

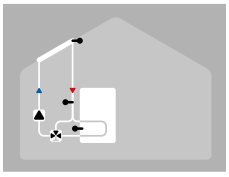

Valvola di chiusura

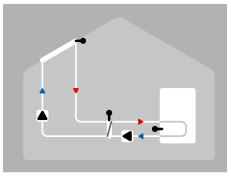

Solare con scambiatore calore (sonda sul secondario) e piscina

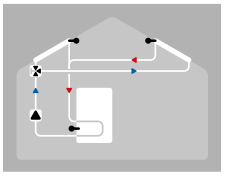

Solare con termostato (riscaldamento integrativo)

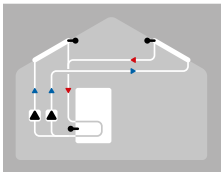

Solare con accumulo 2 zone

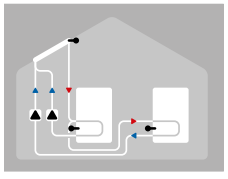

Solare con innalzamento temperatura ritorno riscaldamento

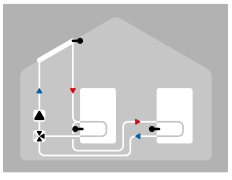

Solare con bypass

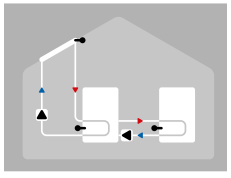

Solare con scambiatore

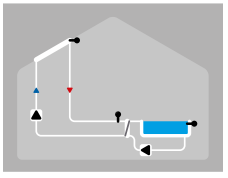

Solare con 2 collettori

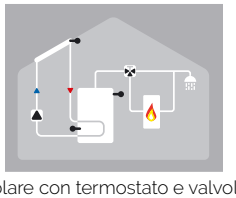

Solare con 2 collettori e 2 pompe

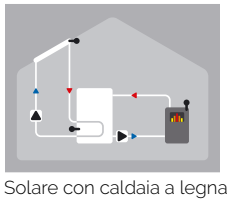

Solare con 2 accumuli e 2 pompe

Solare con 2 accumuli e valvola

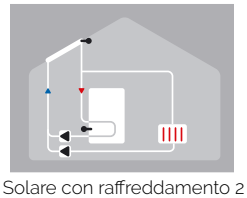

Solare con carico accumulo

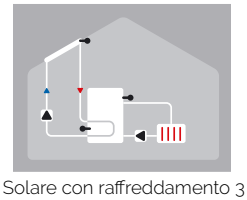

Solare con piscina e scambiatore

Solare con termostato e valvola

Solare con caldaia a legna

Solare con raffreddamento 1 (raffreddamento collettore)

Solare con raffreddamento 2 (raffreddamento collettore)

Solare con raffreddamento 3 (raffreddamento collettore)
